

The ideal way to explore the potential of enterprise SOA

SAP Discovery System for Enterprise SOA powered by Fujitsu Siemens Computers

Powered by Fujitsu Siemens Computers

- ☐ SAP Discovery System for enterprise SOA with unique functions and practical sample scenarios
- ☐ Current PRIMERGY Servers to explore enterprise SOA with full power
- ☐ Completely preinstalled and preconfigured
- ☐ Optionally available enterprise SOA workshops for professional support
- ☐ Ready for upgrade to next Discovery System version

Together with SAP®, we offer customers on their way to an enterprise SOA architecture a complete enterprise SOA environment. This environment is the perfect way to gain an insight into the concepts involved in enterprise SOA and become familiar with the simplicity and flexibility of composite business processes.

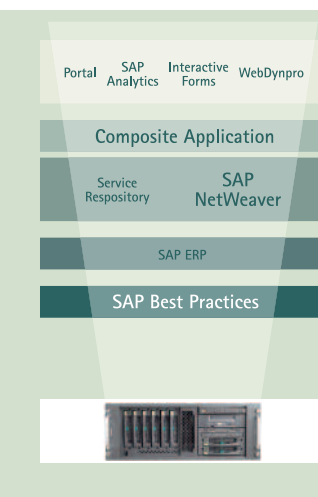

Optimal preparation for new territory

What new possibilities does enterprise SOA offer? How do composite applications streamline work? What does it take to make the introduction of enterprise SOA a success? Now you can find out the answers to these and other questions without extensive preparation. As an SAP customer or SAP partner, you'll find that the SAP Discovery System for enterprise SOA provides optimal preparation for exploring this architecture – with an ideal test environment as well as optionally competent support.

Explore the path to enterprise SOA

Our SAP Discovery System for enterprise SOA comes with everything you need to become familiar with enterprise SOA from the customer perspective. We provide you with a completely preinstalled solution that includes SAP applications, configuration and integration into various process scenarios. For example, you can immediately concentrate on essentials, get to know the world of enterprise SOA and start to explore the path to successful deployment of enterprise SOA from SAP.

SAP Discovery System for enterprise SOA powered by Fujitsu Siemens Computers gives you everything you need for simple evaluation of enterprise SOA scenarios

Let's get started!

Don't even bother to ask yourself what you need to explore enterprise SOA. Just start! With the SAP Discovery System for enterprise SOA, we can offer you a complete, fully documented system, including all SAP software components required for the development and deployment of service-based applications.* As an enterprise architect, business process specialist, IT developer, consultant or system integrator, you can get started immediately – and quickly learn how to work with composite applications as you gain valuable experience with SOAs.

Experience included

Want to explore new territory without unpleasant, time-consuming surprises? Well, nothing could be easier. That's because the experience and expertise of our experts automatically flows into the SAP Discovery System for enterprise SOA. The current Version 3 offers you in-depth expertise – which is enormously helpful, especially because it features the most recent SAP software concepts. For example, the SAP landscape includes the most recent version of SAP NetWeaver™.

The following individual software components are provided:

- ☐ MaxDB 7.6
- ☐ SAP ERP 6.0 SP09 (ECC 6.0) and ERP Enhancement Packs 1+2
- ☐ SAP Solution Manager 4.0
- ☐ Pathfinder for Business User
- ☐ RFID (AII 5.1)
- ☐ GTS 7.1
- ☐ xMII 11.5
- ☐ SAP NetWeaver Visual Composer Tool

GlobalSAPSolutions@fujitsu-siemens.com

☐ SAP NetWeaver 7.0 SP12 platform components:

- ☐ SAP NetWeaver Portal
- ☐ SAP NetWeaver Master Data Management (5.5 SP05)
- ☐ SAP NetWeaver Process Integration
- ☐ SAP NetWeaver Business Intelligence
- ☐ SAP NetWeaver Application Server

Plus the following system components for full power:

- ☐ PRIMERGY TX300 S4 with current Intel® Quad Core technology, 12 GB of memory and 6x500 GB hard disks
- ☐ Microsoft® Windows 2003 Enterprise Edition
- ☐ Preinstallation at our Augsburg location

Performance that defies comparison

The SAP Discovery System for enterprise SOA powered by Fujitsu Siemens Computers offers unique advantages:

- ☐ The Recovery Set: This feature permits simple reuse of the Discovery System to handle various customer-side scenarios. The entire environment can be reset to delivery status and a predefined customer status.
- ☐ PRIMERGY TX300 S4 is available as either a tower or rack system (rack conversion kit required)

We recommend our enterprise SOA Workshops along with our Discovery System. The expertise of leading providers of consulting services for SAP enterprise SOA software solutions such as, for example, SAP Consulting and Fujitsu Services provide effective support as you explore SAP enterprise SOA and let you become thoroughly familiar with SAP software components and SOA concepts. Of course, you can always benefit from having workshop results flow into your individual proof of concept for enterprise SOA.
